Application for Database Administrator

I am applying for the full-time Database Administrator position at Millcreek Township School District. As someone who has always been interested in databases, I am confident that my skills and education would make me a valuable team member.

Currently, as an IT Technician within Millcreek Township School District, I manage technology needs across four buildings. My role includes handling a range of work orders, from troubleshooting student Chromebooks to resolving software issues for teaching staff. This experience has given me a comprehensive understanding of how our technology infrastructure and database procedures impact not only teachers but also students and parents.

I also believe my academic training at Erie Institute of Technology (EIT) provided me with a solid foundation in database fundamentals, equipping me to enhance my knowledge further to meet the specific needs of Millcreek Township School District.

Thank you for considering my application. I am eager to discuss how my background, skills, and enthusiasms align with the needs of your team. Please feel free to contact me at your convenience by email at masonfife@outlook.com or by phone at (814) 823-5387.

Thank you,

Mason Fife
